

**Prerequisite:** The mPassport Seva App supports the Android OS 2.1 and above. The iOS and windows App will be available shortly.

### Step 1: Pre-installation Check

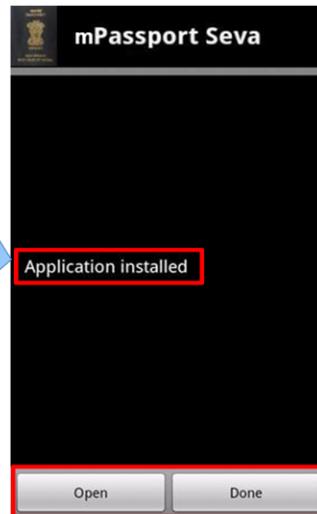

To install the Android Passport application, please ensure that your device allows installation of Non-market applications.

To do this, access Application Settings and select the Unknown Sources checkbox.

### Step 2: Installation

1. Save the mPassport\_Seva.apk file to your phone.

2. Start installation and wait till the success message is displayed.

3. Click Done to return to the Device Home screen or Open to directly open the installed application.

### Step 3: Post Installation Check

After successful installation, access Application Settings and unselect the Unknown Sources checkbox to avoid installation of any other Non-market application.

### Step 4: Accessing Passport Seva Application

Access the Device Applications screen, and click the Passport Seva application icon.

Passport Seva application opens displaying the various available services. Click an option to redirect to the respective screen.
